

Phil McKinney

Phil McKinney is vice president and chief technology officer for the \$40B USD (FY2010) Personal Systems Group at HP. He is responsible for long-range strategic planning and research and development (R&D) for all of the company's PC product lines, including mobile devices, notebooks, desktops and workstations.

In addition, McKinney is responsible for the Innovation Program Office (IPO) at HP. The IPO is chartered to identify, incubate and launch adjacent and fundamentally new products and services that will become the future growth engines for HP.

Before joining HP, McKinney was senior vice president and founding chief information officer for Teligent, a global provider of fixed-wireless services. At Teligent, he led strategy development, IT infrastructure and global operations, managing a team of more than 1,000.

Prior to joining Teligent, McKinney held senior executive positions at Computer Sciences Corporation, where he directed communications industry consulting engagements worldwide and oversaw the division that provided mission-critical system outsourcing for more than 165 wireless and broadband service providers.

McKinney serves on the board of directors The Computer History Museum and The Tech Museum along with the innovation board for Roche Diagnostics. He also serves on the executive board of the Santa Clara County Council for the Boy Scouts of America.

A leading authority on innovation and its impact on business, the economy and culture, McKinney speaks to worldwide audiences at conferences and through his blog (www.philmckinney.com) and weekly podcast (www.killerinnovations.com). Dubbed "chief seer" by *The San Jose Mercury News*, McKinney is a contributing columnist for *Forbes* and writes the column "The Objective" for *Forbes.com* and was named one of the "25 Most Influential People in Mobile Tech" by *LAPTOP Magazine* in 2010.
